**Preserved Star moss - Fire resistance certification**

—

We are glad to announce that Canopy's preserved star moss is fire resistant.

It is therefore perfectly suited for projects in public spaces, shops, and any place where a fire classification is requested.

We conducted laboratory tests according to official standard **NF P 92-501**.

This standard is recognized as one of the most challenging all over the world.

You will find below the tests results showing a M2 classification, which means "**Low flammability**".

PRODUCT REFERENCE	Q INDEX	CLASSIFICATION
MOS Star moss	7.18	M2

CHART LEGEND		
CLASSIFICATION	CLASSIFICATION CRITERIA	INFLAMMABILITY
M4	$Q > 50$	Highly flammable
M3	$15 < Q \leq 50$	Moderately flammable
M2	$2.5 < Q \leq 15$	Low flammability
M1	$0 \leq Q \leq 2,5$	Not flammable
